## OFFSHORE ACCOMMODATION SOLUTIONS

Since our launch in 2002, we have been dedicated to making living offshore more comfortable and efficient.

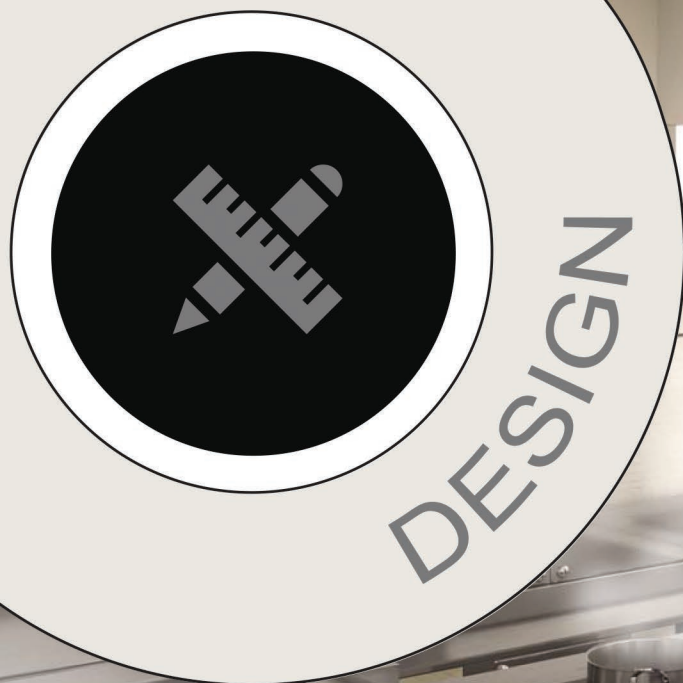

We pull together the essential elements needed to achieve this, from greenfield accommodation consultancy, FEED studies, brownfield engineering and refurbishment through to preventative and breakdown maintenance.

All our services are delivered by our own in-house teams who guarantee we can always uphold our unrivalled reputation for innovation, excellence, and integrity in all that we do.

Much of our work comes to us through referrals from existing clients who know at first-hand that our approach means they can go ahead with even highly complex upgrades confident in the knowledge that we are experts in managing disruption.

- New Build or Refurbishment - Greenfield / Brownfield
